

HOW TO USE THIS GUIDE

This guide uses an internationally agreed method to assess seafood sustainability. To help you make the right choice, fish species are grouped into:

- RECOMMENDED**
 From well-managed, sustainable stocks that are not overexploited. The preferred choice for consumption.
- THINK TWICE**
 From fisheries that are at risk of becoming unsustainable. Only eat these species occasionally, if recommended options are not available.
- AVOID**
 From unsustainable and overfished fisheries. Avoid eating these species at present.

ACRONYMS
PM – Peninsular Malaysia
SB – Sabah
SW – Sarawak
EC – East Coast Peninsular
WC – West Coast Peninsular
M – Malaysia

Malaysia Sustainable Seafood Guide
 May 2010

Did you know that in 40 years we run the risk of not having any seafood to eat, if we continue to consume indiscriminately?

Malaysians are the biggest consumers of seafood in Southeast Asia. 90% of Malaysia's bottom-dwelling fish stock has declined due to unsustainable fishing practices, driven by our high demand for seafood. You can help improve the situation by using this guide to choose sustainably harvested and farmed seafood.

Flower Crab	Gillnet	WC
Red Snapper	Hook & Line	EC & SB
Banana Prawn	Gillnet	M
Coral Grouper	Trap	SB & SW
Seabass	Cage Culture	PM
Tiger Prawn	Pond Culture	PM
White-leg Prawn	Pond Culture	PM
Brown-marble Grouper	Cage Culture	PM

Most shark fisheries are unregulated and many species are overfished. Avoid all shark products as individual species are difficult to distinguish.

AVOID

SPECIES	FISHING METHOD	ORIGIN
Silver Pomfret	Trawl	M
Black Pomfret	Trawl	M
Ray	Trawl	PM
Threadfin Breems	Trawl	M
Dorab Wolf-herring	Trawl	PM
Flounder	Trawl	M
